How to Order Replacement Panels

Order Instructions	
<p>Only art glass that is broken in shipment can be replaced through the Andersen WindowCare® Service Center (888-888-7020).</p> <p>Contact your local dealer for issues such as wrong color, pattern, or other order discrepancies.</p> <p>Art glass replacement parts (stops and hardware) can be found in the individual window or door sections of this catalog.</p> <p>Art glass panels are special order items. To order, please provide the following information:</p>	
Unit Size	Window unit number.
Unit Operations	Left hand, right hand, stationary, vent, locks and no locks.
Quantity	Number of panels.
Pattern/Design	Colonnade, Eucalyptus, Prairie Rhythm, Wichita, Diamond Lights, Lotus, Regency, Taos, Victoria, Affinity, and Harmonics.
Color Palette	See color palette options. Background glass is available in clear, antique and privacy.
Caming Finish	Antique, Brass (replaces goldtone) and Nickel (replaces silvertone).
License number	<p>(Example: 12345678-1-1).</p> <ol style="list-style-type: none"> 1. It is important to capture the license number, as when it is strictly a re-order of the same thing it is cost effective to order the replacement vs. ordering a new piece of art glass. 2. The license number can be found engraved on the lower inside panel. The Andersen logo and name along with the manufacture's date will also be located in this spot.
Sections	<p>Art glass panels can be assembled in multiple sections and are indicated with an asterisk (*) after the unit number. Example: C15* is ordered in two sections. Number 1 would designate the upper section, and number 2 designates the lower section. In the case of certain door panels, 1 would be the upper panel, 2 would be the middle panel, and 3 would be the lower panel. Please specify section number along with the license number when re-ordering. The section number would relate to the license number as 12345678-1-1, with the first number after the license number to determine the quantity of that particular piece made, and the second number determining the section number. The product line and size will designate how many sections art glass may have.</p>
